Jatibonico, Sancti Spíritus, Cuba

ABOUT ME

Computer Science Engineer and **Full Stack Developer** with a comprehensive vision of software development. My education at UCI provided a solid engineering foundation, which I have evolved by building complete solutions with **Symfony 7/8**, **Spring Boot 3** and modern architectures, always thinking about the final product.

I am motivated by transforming ideas into functional, clean and efficient products, taking responsibility for the entire cycle: from data modeling and business logic to the user interface and deployment. I have worked in enterprise environments (Local Development Center, 2021–2024) and on high-complexity independent projects, such as banking queue systems (**SGR-Turnos**) and SaaS platforms with **Stripe**, **OAuth2** and **2FA**, where I have acted as architect and lead developer.

My technical expertise covers both backend (Java/Spring Boot, PHP/Symfony, Node.js, Doctrine ORM) and modern frontend (React, TypeScript, Tailwind CSS, Alpine.js, Twig, vanilla JavaScript). This versatility allows me to make decisions that balance performance, maintainability and user experience, adapting to the needs of each project without losing sight of the overall vision.

I am currently pursuing a **Master's in Applied Informatics** to deepen my knowledge in distributed architectures and high-concurrency systems, convinced that continuous learning is the engine that drives innovative and scalable solutions. I also configure **agentic development environments (harness engineering)** with terminal agents to boost team productivity.

EXPERIENCE

Full Stack Developer · Freelance — 2024 — Present
Independent Projects

- **SGR-Turnos**: banking queue system with Symfony 8, JWT, rate limiting, auditing and Excel export.
- **ComercioLocal**: SaaS e-commerce with Stripe, OAuth2 (Google/Facebook), 2FA and Redis.
- Development of RESTful APIs, microservices with Spring Boot and Docker. Use of AI agents (Claude Code, OpenCode) with **harness engineering** to accelerate the development cycle.

Backend Developer — 2021 — 2024
Local Development Center

- Development and maintenance of web applications with Java / Spring Boot and PHP / Symfony.
- Frontend development with HTML5, CSS3, JavaScript and Tailwind.
- Agile methodologies (Scrum), Git version control and technical support.

Software Development Intern — 2018 — 2021
University of Informatics Sciences (UCI)

- Academic projects with Java, PHP and MySQL.
- Application of design patterns and best practices under supervision.

TECHNICAL SKILLS

LANGUAGES & FRAMEWORKS

PHP 8.x · Symfony 7/8 · Java 17+ · Spring Boot 3 · JavaScript · TypeScript · Node.js · SQL

FRONTEND (INTERMEDIATE)

HTML5/CSS3 · Tailwind · Alpine.js · React · Twig / Stimulus

DEVOPS & CLOUD

Docker · Nginx/Apache · Redis · CI/CD

ARCHITECTURE & SECURITY

JWT / OAuth2 · 2FA · Microservicios (Kong) · Stripe · Rate Limiting

AI-ASSISTED DEVELOPMENT

Claude Code · OpenCode · Skills · Harness Engineering · GitHub Copilot · Prompt Engineering

LANGUAGES

Spanish	Native
English	Basic (A2)

CLEAN CODE · SCALABLE ARCHITECTURE · SECURITY

EDUCATION

Master's in Applied Informatics — 2025 — Present
Universidad José Martí (UNISS)
Specialization in distributed architectures and high-concurrency systems.

Computer Science Engineering — 2017 — 2022
University of Informatics Sciences (UCI)
Project-based education with emphasis on computing fundamentals, software engineering, databases and cutting-edge technologies.

FEATURED PROJECTS

SGR-Turnos-Bandec (Mobile App)

Android

Native app (Kotlin/Compose) for banking queues: JWT auth, offline sync and push notifications.

(demo in development)

SGR-Turnos

Symfony 8

Banking queue management with JWT, rate limiting, auditing and Excel export.

(demo in development)

SGR-Turnos Web

React 19

SPA with React 19, Vite 8 and TypeScript for banking appointment booking. TanStack Query v5, Zustand, protected routes, deduplicated JWT refresh, forms with React Hook Form + Zod and dark mode.

github.com/christianrvdv/sgr-turnos-react-web

ComercioLocal

SaaS

E-commerce platform with Stripe, OAuth2, 2FA, shopping cart and admin panel.

islamarket.aserenet.com

app_almacen

Symfony 7

Inventory control, PDF invoicing (dompdf) and metrics dashboard.

github.com/Christianrvdv/app_almacen

Auth System + JWT

Symfony

JWT authentication, Voters, audit logging and unit tests.

github.com/Christianrvdv/auth-system

Library Microservices

Spring Boot

API Gateway (Kong), Eureka, asynchronous communication.

github.com/Christianrvdv/sistema-biblioteca-microservicios

BANCEC App

Android

Magnetic card request with QR (ZXing), Excel export and statistics.

github.com/Christianrvdv/SolicitudtarjetaBANDEC
